Noah's Journey

Before

Between

After

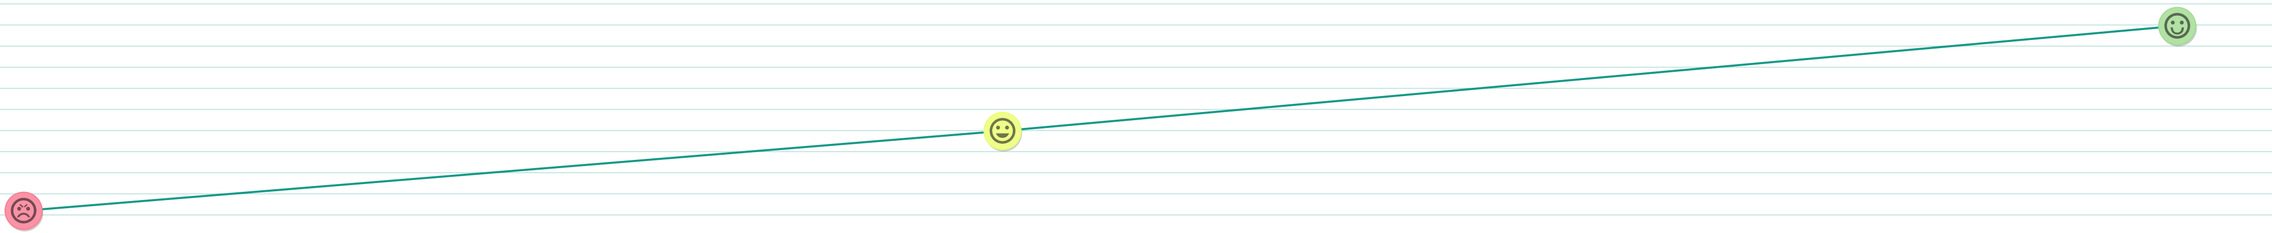

Customer
Customer steps

- Noah needs a specific tool for a one-time task (home repair, moving, DIY).
- He realizes buying the object is too expensive for a single use.
- He looks for rental solutions: Stores are expensive or far away, Borrowing from friends is inconvenient
- He hears about NeedItNow as a local and cheaper alternative.
- Noah creates an account quickly, searches for the object using the location and availability
- He discovers the deposit system and reputation levels. as a new user, he must pay a higher deposit.
- He checks lender profiles and ratings, He sends a rental request to a nearby lender.
- He confirms payment and deposit through the platform. He picks up the object locally.
- Noah returns the object on time.
- The object is checked and accepted by the lender.
- The deposit is released automatically.
- Noah leaves a review. His reputation score improves, lowering future deposits.

Customer
Customers Objectives

- Get the tool quickly and nearby.
- Pay less than buying or store rental.
- Avoid complicated rental contracts.
- Make sure the lender is trustworthy.
- Access the object as fast as possible.
- Understand clearly what he is paying and why.
- Feel protected against unfair treatment.
- Avoid unnecessary communication friction.
- Avoid conflicts or penalties.
- Recover his deposit quickly.
- Be recognized as a reliable renter.
- Make future rentals easier and cheaper.

Customer
Customers Emotions

Customer
Customer's emotions explanations

- Noah is motivated by the urgent need.
- The deposit feels expensive at first. Clear explanations help him accept it.
- Noah feels relieved once the deposit is released. He understands the fairness of the trust system. The experience matches his need for efficiency.

Maria's Journey

Before

Between

After

Customer

Customer Steps

- Maria Notice that one of his tool is rarely used
- She reflects on the cost and environmental impact of owning unused objects.
- She hears about NeedItNow through a local channel (colleague, neighbor, online mention).
- She visits the website to understand how it works.
- She creates an account, verifies her identity, and discovers the dynamic deposit system and reputation logic.
- She list her object and receive a rental request form a nearby user.
- She checks the renter's profile and reputation, then she accepts the request.
- The object is returned on time and in good condition.
- The deposit is automatically released.
- Maria leaves a review for the renter, and her reputation score improves on the platform.
- She considers listing another object or using the app again.

Customer

Customer Objectives

- Find a safe and trustworthy way to lend her object.
- Make sure the process is simple and time-efficient.
- Ensure her object is financially protected.
- Maintain control and visibility over who rents her object.
- Feel protected by the platform in case of damage.
- Save time thanks to a clean UX and clear steps.
- Experience a human and local interaction, not a cold transaction.
- Confirm that the system truly protects lenders.
- Build a long-term trust relationship with the platform.
- Align her actions with her environmental values.

Customer

Customer Emotions

Customer

Customer Emotions Explanations

- Maria is interested in the concept (eco-friendly, local), but still unsure.
- The platform-managed deposit and reputation system strongly reassure her.
- Maria feels:
  Smart (she earned money effortlessly)
  Responsible (eco-friendly action)
